Online Early Music Forum (OEMF)
music in lockdown with **Jamulus**
=====

Most of us know that making music over the internet is not possible with systems like **Zoom**, (because of something called *latency*). People have been singing their parts solo, then mixing them into video performances.

Well, now we can make real harmony online. We have been testing **Jamulus**, which minimizes latency and enables us to sing or play together in very nearly the usual way. We'd love you to join us.

--

[Install Jamulus](#) and run it.

Press '**Connect**'; then press '**List**' and choose **Genre Classical/Folk/Choir**. Choose **OEMF** from the list and **Connect**.

There is a '**Chat**' feature in case you are not being heard or don't want to interrupt. Meet on Monday, Wednesday, Friday at 6 pm.

--

Jamulus has excellent [documentation](#), helpful [discussion fora](#) and a [download page](#). Start [here](#). Setting it up can be straightforward or a struggle, depending on what technology you have. The community is extremely helpful for those who need it. The software has versions for Windows, Mac and Linux and a brand new **Jamulus OS**.

--

Music can be fun again!
